Sample Questions for Identifying Military Affiliation

The questions below can be used to guide Children's Advocacy Centers in gathering information to identify military affiliation of parents and caregivers, child victims, youth with problematic or illegal sexual behavior, and/or adult suspects. Identifying a military connection is the first step in initiating the CAC's protocol for coordinating with military partners like Family Advocacy Program and military criminal investigative organizations. CACs may add these questions to their verbal intake interview or include a variation of them on intake forms.
