

# CHILD ADVOCACY CENTER SOLUTIONS

*Ending the circle of violence by providing CACs the tools for justice to be served and healing to begin.*

## Clarity

StarWitness® understands that child advocacy centers need interview recording equipment that offers faithful representation of the spoken word, even when whispered or muffled.

At StarWitness, we concentrate on building the best in-room and mobile interview room equipment to provide you with the peace of mind to know that what is said is recorded.

We offer two interview recording solutions for our child advocacy customers. Both in-room and mobile recording solutions are known throughout the industry for their exceptional quality and ease-of-use. The software includes a simple export process for an effortless presentation in court.

We strive to help provide solutions to your problems. From our corporate CEO to every employee, we're here to help you record the evidence you need.

Give us a call to arrange an online demonstration of our interview recording solutions. We can also ship you one of our portable Field Interviewers to tryout at no charge.

StarWitness offers the most comprehensive interview recording system for child advocacy centers. Our solutions are built from the ground up, giving you the reliability, security, and ease-of-use needed for you and the judicial system.

SUPERIOR AUDIO	SIMPLE OPERATION	SECURE
Audio captured is specifically tuned to record voices	One button push to record	Each recording has a unique authentication code that is encrypted and watermarked into the video of the recording
No muffled voices or problems with the interviewer's voice being too loud and the subject's voice too quiet	Red light illuminates to signal recording is active	Software allows users to assign ownership and verify chain-of-evidence for court
Balanced audio for clear audio recording without hum pickup or high-frequency loss	Access interviews through your network using your web browser	Complies with best practices for interview recording and retention
