

Functional Behavior Analysis

Puzzle Hunt

Learn all about a client's symptoms through a fun puzzle and making into a hunt with plastic Easter Eggs for younger clients.

This tool is designed to help you learn about a client's symptoms in a fun and efficient way. Included is a 2 page document that can be pasted together and cut into a puzzle. I highly recommend laminating this so it can be used over and over again.

Functional Behavior Analysis Puzzle Hunt

Directions: Cut each puzzle piece and hide it for the client to find (the "hunt" part works best for young clients, to make this even more fun put the puzzle pieces in large Easter eggs with one jelly bean per egg that can be eaten when the question is answered). Put the questions to each piece on the opposite side and put it together to help understand the client's symptom in a much more detailed way.

What makes it better?

What time of day does it happen the most?

Who is around?

How does your body feel?

What are your thoughts?

What makes it worse?

Where are you?

What are your feelings?

Do you think it can get better?

Why do you think this happens?

What keeps it going?

Do you want to change this?

What happens after?

What do you need from others around you?

What are your worries about this?

What happens before?
