

A good rule to know

MY PERSONAL SAFETY RULE:

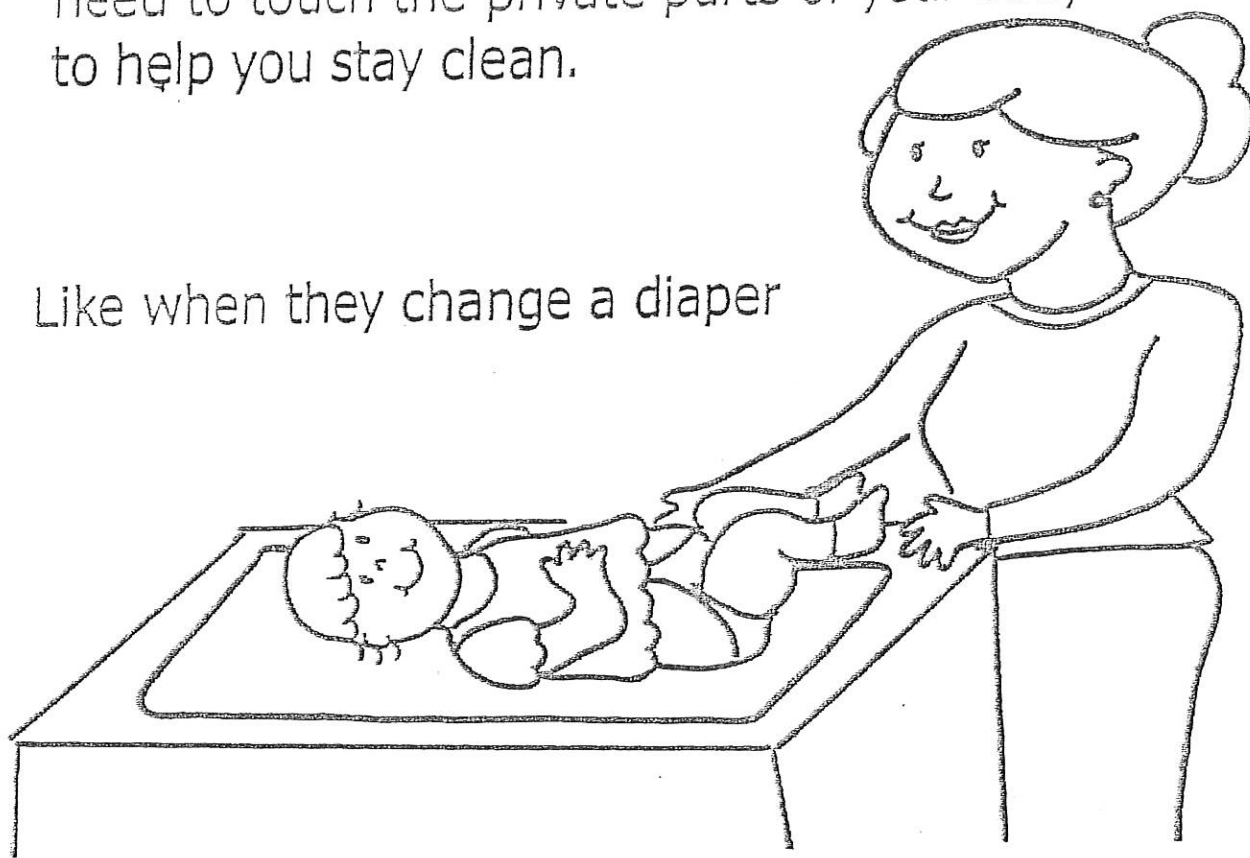

No one should touch
the private parts of your body
unless it is to keep you clean or healthy.

Private parts of your body are those parts
that are covered by your swimming suit.

Sometimes people who take care of you
need to touch the private parts of your body
to help you stay clean.

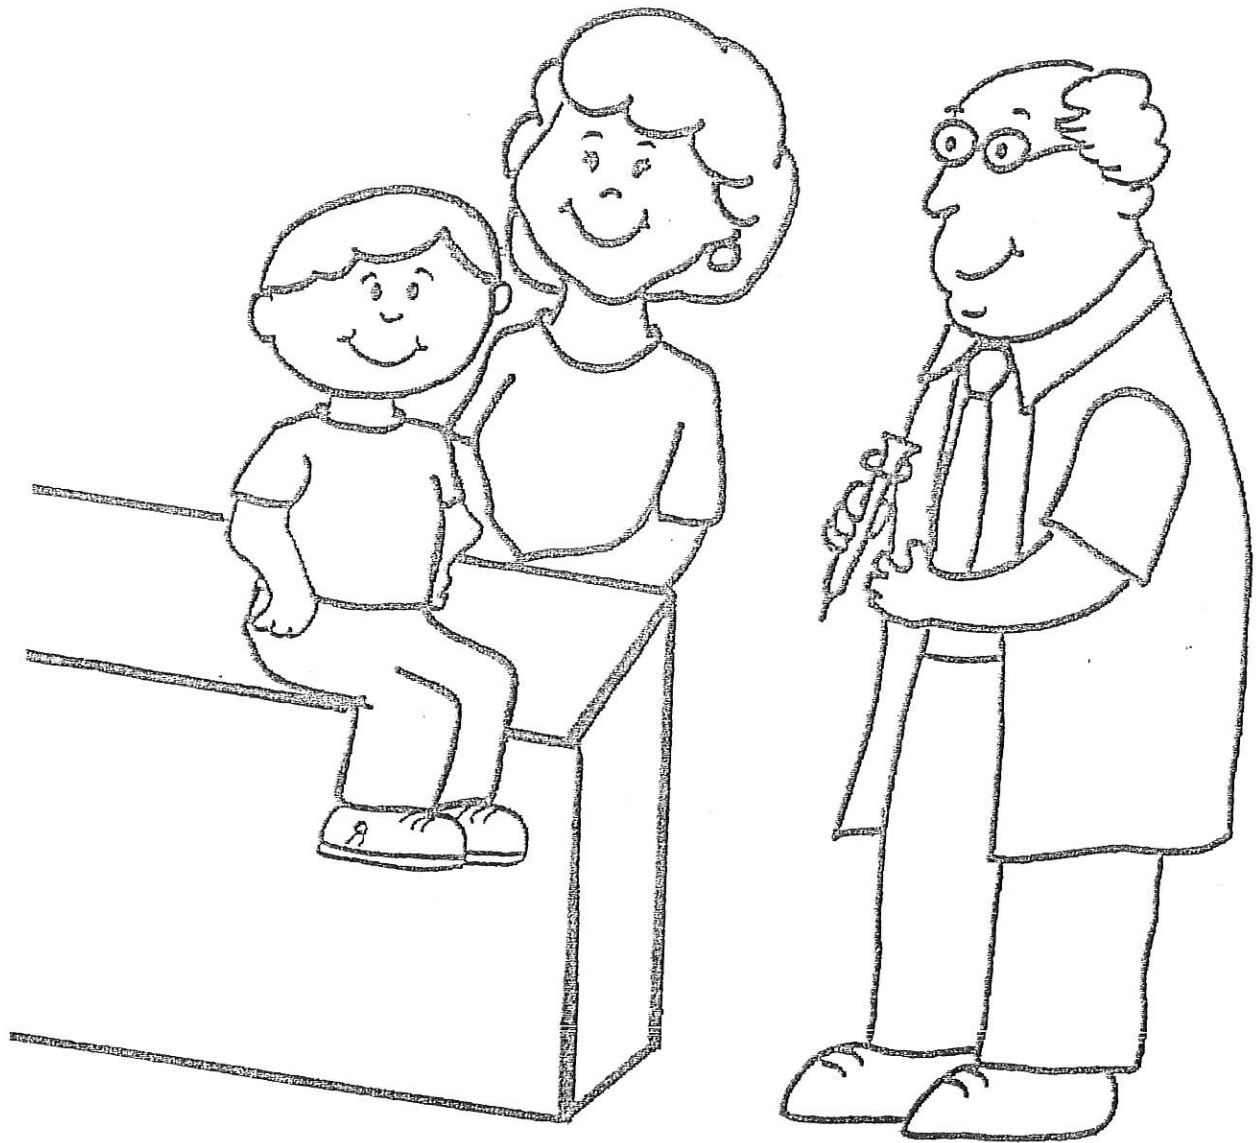

Like when they change a diaper

or when you need help with a bath.

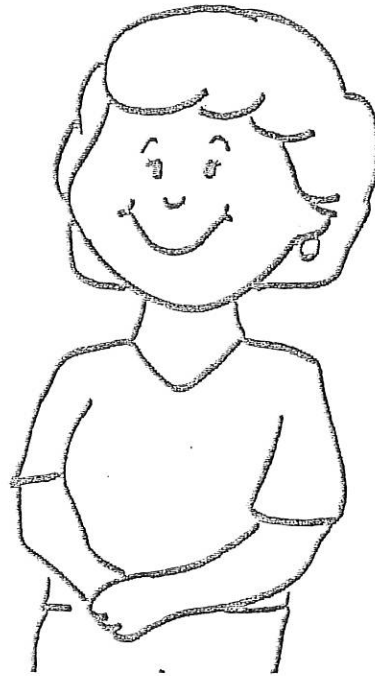

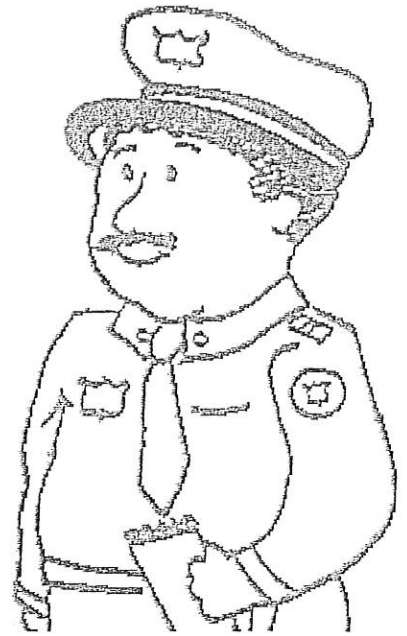

A Doctor might need to touch the private parts of your body to help keep you healthy.

Like sometimes when you have to have a shot

If anyone breaks this rule you should
TELL A GROWN UP!

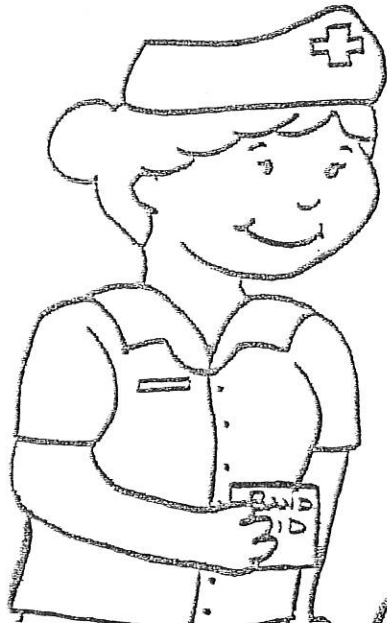

You could tell
a teacher or a policeman.

You could tell a mom.

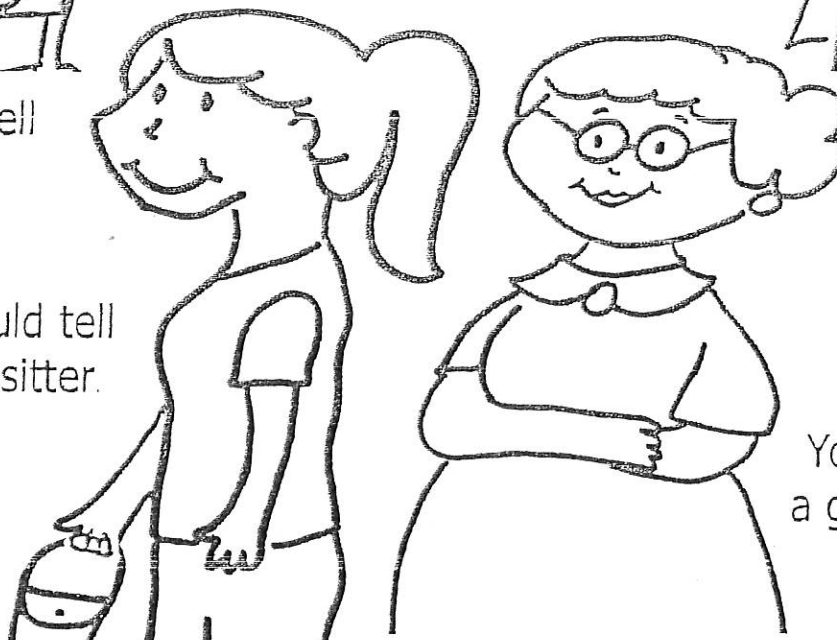

You could tell
a doctor.

You could tell
a nurse.

You could tell
a babysitter.

You could tell
a grandparent.
