Forensic Interview Room Recording

V2 Advocate's user-friendly technology allows Forensic Interviewers to focus on victim's interviews without distraction — yet have peace of mind, knowing that recordings will be automatically stored and secured after each session.

Ready to record when you are!

Record in High-Definition IP Video

V2 Advocate records two HD camera views in each room and captures up to five hours of High Definition video on 1 DVD!

FORENSIC INTERVIEW RECORDING SYSTEM

Record:

- One button Start/Stop recording
- Capture all voices with crystal clear audio recording
- Document victim's demeanor, reactions, and body language with HD Video
- Record multiple rooms simultaneously in MP4 format

Monitor:

- In real-time, remotely monitor an interview via a network connection
- View system activity and run reports with Audit Log

Replay:

- Immediately replay recordings on V2 unit or with security authorization on other network PCs
- Find recordings with easy-to-use search features

Annotate:

- Annotate critical interview moments with tagging, bookmarking, and screen shots
- Share notes for collaboration
- Take notes in real-time as an observer or attach after interview

Reproduce & Store:

- Save time reproducing recordings by concurrently burning multiple DVDs
- Choose from long-term & multiple storage options: (HD, flash drive, DVD, CD, RAID, and NAS)

Preserve interviews:

- Use Evidence Locker to securely store thousands of hours of interviews
- Assure interview integrity with watermark technology that includes built-in tamper protection
