Different from traditional optical colposcopes, the AL 106 HD has superior spot-on-spot subtraction technology, unique CCD optics, and multiple filters to ensure improved visualization of blood vessels.

Features & Benefits

- 1.43M pixels for exceptionally high resolution
- 40x magnification captures the smallest aberrations
- HDMI allows connection to on-site equipment in High Definition
- White/Blue LED Light Source for optimal visualization
- 1080 horizontal resolution appears clearly on a wide variety of screens

- CMOS Camera is FDA approved
- 3x green and 2x blue filters show hidden tissue damage
- Auto and manual focus accommodate any situation
- Image freeze function allows capture of snap-shots within a video
