Jackson County Child Advocacy Center
ENABLING EMERGENCY INTERVIEWS

Accelerating Critical Access to Digital Evidence

Prior to the pandemic, Jackson County Child Advocacy Center in Michigan was already using Vidanyx to store forensic interviews. When restrictions were put in place in March 2020, Vidanyx enabled the forensic interviewers to continue conducting emergency interviews and to share evidence immediately with their MDT with no contact, no downloads, no installs, and no DVDs.

www.vidanyx.com

the only evidence collaboration software for child advocacy

VidaNyx was built from the ground up as a collective effort working with the National Children's Alliance, and an advisory council of expert attorneys, forensic interviewers, therapists, the FBI, prosecutors, Child Advocacy Centers across the U.S., government officials and philanthropists.

Multidisciplinary teams across the country are using VidaNyx to securely view, share and store forensic interview videos, powered by the ease and security of the cloud. VidaNyx features automatic transcriptions, digital chain of custody, military-grade security, video annotations, watermarking, and more.

when it matters most...

The detective requested a forensic interview on a Friday afternoon on a case where a child had disclosed and other children were in danger unless the alleged perpetrator was arrested. We were able to complete the emergency interview, the District Attorney's office was able to view the interview that afternoon, and the detective was able to go arrest the perpetrator before the weekend.

Preserving HIPAA Integrity in Digital Evidence Collaboration

The Baltimore Child Abuse Center team in Maryland uses VidaNyx as its HIPAA-compliant way to share videos, reports, and complete digital case files to maintain case management. Powering secure digital collaboration has been especially meaningful to continue acute case management uninterrupted while working remotely during the pandemic.
